THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

Allowable Subject Matter

1. Applicant's amendments and remarks are sufficient to overcome previous rejections under 35 USC 101. Previous rejections under 35 USC 101 are withdrawn.
2. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
3. Claims 1-11 and 31 allowed.
4. The following is an examiner's statement of reasons for allowance: The cited prior art, taken alone or in combination, fails to teach the claimed subject matter of claims 1-11 and 31. Specifically, the prior art fails to teach a transformation of a product space to provide a working transformed space wherein the distribution induced on the resources is transformed into a distribution with a diagonal covariance matrix while optimizing a multivariate representation of resources wherein resources are represented in a space plan.
5. The prior art of reference most closely resembling Applicant's claimed invention are Dietrich et al, US 5,630,070 and Hillier et al (*Introduction to Operations Research*).

Regarding independent claims 1 and 11:

6. Hillier et al teaches optimizing a multivariate representation of resources using multiple single variable optimizations, wherein resources are used in producing a set of products, and the resources, set of products and their respective connectivities being represented in a space plan. Hillier et al also teaches optimizing wherein a non-linear expected value function associated with

Art Unit: 3624

the resources and products is converted into a closed form expression and transforming the product space plan into a working transformed space plan with products being transformed into working elements. Elemental blocks are formed as a function of a single variable of the multivariate representation with elements being loaded with resources that gate production of the elements and examining elemental blocks to determine gating wherein if a first element has not been loaded with a first resources, performing a re-loading step to form elemental blocks as a function of a single variable of the multivariate representation with the first element being reloaded with the first resource and solving for the maximum of each elemental block over each associated single variable of the multivariate representation. Hillier et al also determines the optimum level of resources as a function of the solved for maximums.

Hillier et al fails to teach the transforming step involves taking a transformation of the product space to provide the working transformed space wherein the distribution induced on the resources is transformed into a distribution with a diagonal covariance matrix. Further, Hillier et al fails to teach the transformation including an inverse Cholesky transformation of the product space to provide the working transformed space.

7. Dietrich et al teaches optimizing a multivariate representation of resources using multiple single variable optimizations, wherein resources are used in producing a set of products, and the resources, set of products and their respective connectivities being represented in a space plan. Dietrich et al also teaches optimizing wherein a linear expected value function associated with the resources and products is converted into a closed form expression and transforming the product space plan into a working transformed space plan with products being transformed into

Art Unit: 3624

working elements. Elemental blocks are formed as a function of a single variable of the multivariate representation with elements being loaded with resources that gate production of the elements and examining elemental blocks to determine gating wherein if a first element has not been loaded with a first resources, performing a re-loading step to form elemental blocks as a function of a single variable of the multivariate representation with the first element being reloaded with the first resource and solving for the maximum of each elemental block over each associated single variable of the multivariate representation. Dietrich et al also determines the optimum level of resources as a function of the solved for maximums.

Dietrich et al fails to teach optimizing wherein non-linear expected value functions are used and wherein the transforming step involves taking a transformation of the product space to provide the working transformed space wherein the distribution induced on the resources is transformed into a distribution with a diagonal covariance matrix. Further, Dietrich et al fails to teach the transformation including an inverse Cholesky transformation of the product space to provide the working transformed space.

Claims 2-10 and 31 are allowed for at least the same reasons as applied to claims 1 and 11 above.

8. In addition, Applicant's reply makes evident the reasons for allowance, satisfying the record as a whole as required by rule 37 CFR 1.104(e). See MPEP 1302.14

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 3624

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

9. The drawings filed on 1/26/2000 are acceptable subject to correction of the informalities indicated below. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

10. The drawings are objected to because:

- a. Handwritten numerals and figures not legible in all instances.
- b. Margins do not meet requirements. Each sheet must include a top margin of at least 1 inch, a left side margin of at least 1 inch, a right side margin of at least 5/8 inch and a bottom margin of at least 3/8 inch

11. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

Art Unit: 3624

pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as “amended.” If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor’s name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as “Annotated Sheet” and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the

Art Unit: 3624

“Notice of Allowability.” Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.
